RE: Updated UC Guaranteed Transfer Pathways Templates for Chemistry and Physics

The University of California Transfer Pathways (UCTP) Guarantee pilot project in Chemistry and Physics templates (TMC) were released in early July. Since their release, questions from the field have required updates to the templates for better clarification. The changes include:

- Clarification regarding the GPA of 3.5 in the major;
- Confirmation that the language requirement can be completed in high school;
- Verification that C-ID Math 910-S is acceptable for Math 240 and Math 250.

Additional details, not presented on the TMCs, affirm that course units presented are minimum requirements. Units can exceed the units presented on the TMC. Lastly, local degree requirements cannot be used when developing the UCTPs.

We appreciate and acknowledge the work of the Academic Senate for the California Community Colleges (ASCCC) in aiding and updating the TMCs. If you have any additional questions please contact Raul Arambula, dean of Curriculum, Chancellor's Office.
